NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(Unaudited – Prepared by Management)

(Expressed in Canadian Dollars)

FOR THE THREE MONTHS ENDED SEPTEMBER 30, 2020 AND 2019

1. NATURE AND CONTINUANCE OF OPERATIONS

Defiance Silver Corp (“the Company” or “Defiance”) was incorporated on July 19, 2007 under the Business Corporations Act of the Province of British Columbia. The Company’s principal business is the acquisition and exploration of exploration and evaluation assets. The Company’s registered and records office is at Suite 2900 - 550 Burrard Street, Vancouver, BC, V6C 0A3. The Company is listed on the TSX Venture Exchange under the symbol “DEF”.

The Company’s condensed consolidated interim financial statements are presented in Canadian dollars which is the functional currency.

At the date of these condensed consolidated interim financial statements, the Company has not been able to identify a known body of commercial grade ore on any of its exploration and evaluation assets. The ability of the Company to realize the costs it has incurred to date on these exploration and evaluation assets is dependent upon the Company being able to identify a commercial ore body, to finance its exploration costs and to resolve any environmental, regulatory or other constraints which may hinder the successful development of the exploration and evaluation asset. To date, the Company has not earned revenues and is considered to be in the exploration stage.

Going Concern of Operations

These condensed consolidated interim financial statements have been prepared assuming the Company will continue on a going-concern basis. The Company has incurred losses since inception and the ability of the Company to continue as a going-concern depends upon its ability to develop profitable operations and to continue to raise adequate financing. Management is actively targeting sources of additional financing through other business and financial transactions which would assure continuation of the Company’s operations and exploration programs. In order for the Company to meet its liabilities as they come due and to continue its operations, the Company is solely dependent upon its ability to generate such financing. The Company expects to use similar financing techniques in the future and is pursuing such additional sources of financing as estimated to be required to sufficiently support its operations until such time that its operations become self-sustaining.

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company’s business, its ability to raise funds or results of operations at this time.

At September 30, 2020, the Company had cash of \$10,203,336 (June 30, 2020 - \$569,031) and working capital of \$9,537,505 (June 30, 2020 – working capital deficiency of \$1,441,115). The Company will require additional funds to support its exploration activities and meet working capital requirements in the next twelve months. These material uncertainties may cast significant doubt upon the Company’s ability to continue as a going concern. There can be no assurances that management’s plans for the Company will be successful.

2. BASIS OF PREPARATION

Statement of Compliance

These condensed consolidated interim financial statements, including comparatives have been prepared using accounting policies consistent with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and interpretations issued by the International Financial Reporting Interpretations Committee (“IFRIC”).

The financial statements were authorized for issue by the Audit Committee and Board of Directors on November 25, 2020.

The condensed consolidated interim financial statements have been prepared on a historical cost basis, except for financial instruments measured at fair value. In addition, these financial statements have been prepared using the accrual basis of accounting except for cash flow information.

The preparation of these condensed consolidated interim financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the period. Actual results could differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Critical Accounting Estimates

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the financial position reporting date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

1. *Recoverability of receivables and value added tax:* which are included in the consolidated statements of financial position. Management has determined that receivables are recoverable given management’s experience in realizing receivables and refunds of value added tax.
2. *Carrying value and the recoverability of exploration and evaluation assets:* Management has determined that exploration, evaluation and related costs incurred which have been capitalized may have future economic benefits and may be economically recoverable. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefits including geologic and other technical information, scoping and prefeasibility studies, accessibility of facilities and existing permits.
3. *Valuation of share-based compensation and brokers’ warrants:* Management uses the Black-Scholes Pricing Model for valuation of share based compensation and brokers’ warrants, which requires the input of subjective assumptions including expected price volatility, interest rate and forfeiture rate. Changes in the input assumptions can materially affect the fair value estimate and the Company’s results and equity reserves.
4. *Income Taxes:* In assessing the probability of realizing deferred tax assets, management makes estimates related to the expectation of future taxable income, applicable tax opportunities, expected timing of reversals of existing temporary differences and the likelihood that the tax position taken will be sustained upon examination by applicable tax authorities. In making its assessments, management gives additional weight to positive and negative evidence that can be objectively verified.

2. BASIS OF PREPARATION (Cont'd)

While management believes that these estimates are reasonable, actual results could differ from those estimates and could impact future results of operation and cash flows.

Critical Accounting Judgements

The following are key assumptions concerning the future and other key sources of estimation uncertainty that have significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year:

1. *Going concern of operations:* The financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The assessment of the Company's ability to source future operations and continue as a going concern involves judgement. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. If the going concern assumption is not appropriate for the financial statements, then adjustments would be necessary in the carrying value of assets and liabilities, the reported revenue and expenses and the statement of financial position classifications used (Note 1).
2. *Determination of functional currency:* The Company determines the functional currency through the analysis of several indicators such as expenses and cash flow, financing activities, and frequency of transactions with the reporting entity.
3. *Determination of asset purchase vs business acquisition:* The Company performed an analysis of several indicators such as who is the acquirer in the transaction, the definition of a business and how the acquisition should be accounted for.
4. *Valuation of the acquisition of a public company:* The Company acquired a publicly-traded company in December 2018 (Note 7). The process for determining whether the acquisition was an asset purchase versus a business acquisition was performed and primary consideration was given to the exploration stage of mineral properties, among other items. Shares issued for the acquisition were valued on the issue date and the excess of overall acquisition costs over net assets acquired was attributed to the mineral properties acquired.

6. EXPLORATION AND EVALUATION ASSETS

Title to exploration and evaluation assets involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral claims. The Company has investigated title to all of its exploration and evaluation assets and, to the best of its knowledge, title to all of its interests are in good standing.

6. EXPLORATION AND EVALUATION ASSETS (cont'd...)

Tepal Project

As a result of the acquisition of Valoro, the Company acquired a 100% right, title and interest in mining claims located in the state of Michoacán, Mexico (the “Tepal Project”)

In 2009 Valoro and Arian Silver Corp. (“Arian”) entered into an agreement whereby Valoro was granted the exclusive rights to purchase Arian’s 100% interest in the Tepal Gold-Copper Project. Under the terms of the agreement, Valoro completed the purchase of 100% of the property, by delivering to Arian US\$3.0 million in staged payments. Valoro also assumed the balance of Arian’s obligations under the terms of an underlying property option agreement with Minera Tepal SA de CV (“Minera Tepal”) subject to a 2.5% NSR and has completed staged payments to the underlying property vendor of US\$3,200,000.

San Acacio Project

The Company entered into an option agreement on October 24, 2011, subsequently the subject of several amendments, with the Mexican owners (“the Vendors”) for an option to purchase a 100% interest in the San Acacio property consisting of 10 mining concessions and associated surface rights and tailings. The San Acacio property is located approximately 6.5 km north of the city of Zacatecas, Mexico.

The Company has paid US\$3,701,070 towards the agreement through September 30, 2020.

During the year ended June 30, 2020 the Company renegotiated and extended the terms of its San Acacio Silver Project option agreement by three years from September 27, 2020 to September 27, 2023. In addition, 80% of the option payments due before March 27 and June 27, 2020 have been deferred as a part of this extension. The Company will make quarterly payments, over three years, to the property vendor. As a result of the amending agreement, the payment terms are as follows:

6. EXPLORATION AND EVALUATION ASSETS (cont'd...)

The property is subject to a 2.5% net smelter return royalty (“NSR”) payable to the vendors on production from the property. The Company will have the right to purchase the NSR at any time for US\$2,500,000 which will escalate with the official Mexican Inflation Index after a five-year period. Should the agreement be terminated prior to September 27, 2023 a break fee equal to 5% of the outstanding option balance shall be paid to the property vendor.

Following the first anniversary of the purchase of the Assets, the Company must make minimum annual royalty payments of US\$125,000. The minimum royalty commitment terminates in the event that the production royalty paid is equal to or higher than the equivalent to the minimum that would have been due during six consecutive months.

Surface rights agreements

In August 2014, the Company obtained authorization to temporarily occupy and explore certain land holdings on the San Acacio property. In order to keep the agreement in good standing, the Company is required to make semi-annual payments during the exploration phase and the development phase. The agreement will be valid for twenty years with the option to extend in the future.

On February 27, 2015, the Company entered into an additional surface rights agreement for the right to occupy and perform exploration work on the San Acacio property. The Company will have authorization to explore the surface of the property for a term of three years which can be extended for an additional three years at the Company’s choice, by making annual advance payments and by paying a one time fee on the signing of the agreement. 12. FINANCIAL AND CAPITAL RISK MANAGEMENT

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;

Level 2 – Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly;
and

Level 3 – Inputs that are not based on observable market data.

The fair value of the Company's receivables, accounts payable and accrued liabilities, and loan payable, approximate carrying value, due to their short-term nature. The Company's other financial instrument, cash, under the fair value hierarchy, is measured based on level one quoted prices in active markets for identical assets or liabilities. The Company is exposed to varying degrees to a variety of financial instrument related risks:

Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations.

The Company's cash is held at large Canadian financial institutions in interest bearing accounts. The Company has no investment in asset backed commercial paper.

The Company's receivables consist mainly of GST/VAT due from the governments of Canada and Mexico. As such, the Company does not believe it is subject to significant credit risk.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at September 30, 2020, the Company had cash of \$10,203,336 (June 30, 2020 - \$569,031) to settle current liabilities of \$897,774 (June 30, 2020 - \$2,083,081). The Company is considered to be in the exploration and evaluation stage. Thus, it is dependent on obtaining regular financings in order to continue its exploration and evaluation programs. Despite previous success in acquiring these financings, there is no guarantee of obtaining future financings. The Company's cash is invested in business accounts with quality financial institutions, is available on demand for the Company's programs, and is not invested in any asset backed commercial paper.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

a) Interest rate risk

The Company has cash balances and interest-bearing investments and has no debt instruments that bear variable interest rates. The interest earned on the investments approximates fair value rates, and the Company is not at a significant risk to fluctuating interest rates. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its financial institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks.

12. FINANCIAL AND CAPITAL RISK MANAGEMENT (cont'd...)

b) Foreign currency risk

The Company's operations are in Canada, the United States and Mexico. The international nature of the Company's operations results in foreign exchange risk as transactions are denominated in foreign currency.

The operating results and the financial position of the Company are reported in Canadian dollars. The fluctuations of the operating currencies in relation to the Canadian dollar will, consequently, have an impact upon the reported results of the Company and may also affect the value of the Company's assets and liabilities.

The Company has not entered into any agreements or purchased any instruments to hedge possible currency risks at this time.

Based on the Company's net exposures as at September 30, 2020 and assuming that all other variables remain constant, a 10% depreciation or appreciation of the Canadian dollar against the US dollar would result in a decrease/increase of \$39,543 in the Company's net earnings. Likewise, a 10% depreciation or appreciation of the Canadian dollar against the Mexican peso would result in a decrease/increase of \$73,171 in the Company's net earnings.

c) Price risk

The Company is exposed to price risk with respect to commodity prices. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors the commodity prices of precious metals, and the stock market to determine the appropriate course of action to be taken by the Company.

Based on management's knowledge and experience of the financial markets, management does not believe that the Company's current financial instruments will be affected by interest rate risk, currency risk and credit risk.

Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration of its exploration and evaluation assets, acquire additional exploration and evaluation assets and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. In the management of capital, the Company includes components of shareholders' equity. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash.

There were no changes in the Company's approach to capital management.
