ZACATECAS DISTRICT

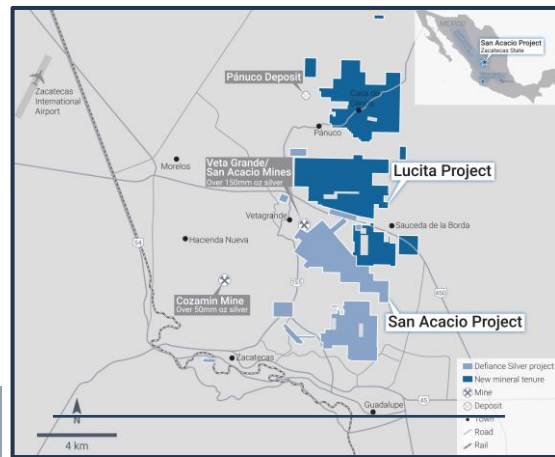

- Located in the Zacatecas Silver District, one of the most prolific silver jurisdictions in the world.
- Strategic land package on the high-grade Veta Grande vein structure and Mala Noche belt.
- Recent work highlights the potential for composite vein systems at depth and the presence of a long-lived mineralizing system at San Acacio, along with several unexplored targets at Lucita and Lagartos.

TEPAL

- Large, advanced-stage Gold & Copper project in Michoacán.
- Established resource base with strong potential to increase Au and Cu resources through targeted exploration and systematic drilling.
- Attractive economics at current spot prices and strong grades open at depth in South Zone where high-grade Au-Ag epithermal zones remain largely untested.

ZACATECAS DISTRICT PROJECTS | WITHIN THE BILLION OZ ZACATECAS SILVER CAMP

- Located in Zacatecas, Mexico; option to acquire 100% ownership.

- Significant intersections outside of current resource; Base Metals never tabled into previous resource estimates.
- Lucita project hosts on-strike extension of the Panuco deposit and several undrilled targets.
- The Zacatecas Silver district has produced >1 Billion ozs Ag, still a prolific mining region for silver and base metal deposits.
- “Fresnillo in the 60s”.
 - Similar crustal position/crustal blocks
 - Fresnillo out of ore by the mid 1960’s; now the world’s largest primary silver mine
